Annex A – Participant Identification and Declaration

Contact names stored on the phone are not shown in the transcript. Enter names below only where you know who is associated with a phone number.

Records may have been exported from a saved archive. The selected records do not establish that the phone contained no other messages or calls.

Participant identification

+61400000001 — Name: _____

+61400000002 — Name: _____

Client (source phone user) — Name: _____

Source phone number, if known: _____

Declaration by Phone Owner

I confirm that I am the owner or authorised user of the phone from which the records in this document were originally captured.

To the best of my knowledge, this document accurately represents the selected records captured from that phone for the period shown. I have not knowingly altered their content after capture.

Where I have entered names above, they identify the people I understand to be associated with those phone numbers.

Times are displayed in Australia/Sydney, the timezone of the phone used to export this PDF. Daylight-saving adjustments follow each record's date. This may differ from where a message or call originally occurred.

In Court-Ready exports, contact names are not shown. Messages sent from the source phone are labelled "Client". All other participants are labelled using phone numbers only.
